

An index to *Mechanical Engineering* articles for 1993

FEATURE ARTICLES BY AUTHOR

Antoniak, Z.I., et al.

"Integrating Thermal Energy Storage in Power Plants," September, pages 84-90.

Ashley, Steven

"Boeing 777 Gets a Boost from Titanium," July, pages 60-65.

"Cheetah Sprints to World Record," February, pages 56-59.

"Designing for the Environment," March, pages 52-55.

"Designing Products with Perforated Metals," June, pages 64-66.

"Failure Analysis Beats Murphy's Law," September, pages 70-72.

"Flexible Sampler for Diesel Exhaust," April, pages 70-71.

"Flywheels Put a New Spin on Electric Vehicles," October, pages 44-51.

"High-Tech Rackets Hold Court," August, pages 50-55.

"Making of an Effective Manager," January, pages 61-63.

"Meeting the Aviation Challenges of the Pacific Rim," September, pages 74-76.

"Molding Stronger Plastic Parts," November, pages 56-59.

"Niagara's Sovereignty," January, page 69.

"Putting a Suspension Through Its Paces," April, pages 56-57.

"Rapid Prototyping for Artificial Body Parts," May, pages 50-53.

"Stealth Ship Undergoes Sea Trials," June, pages 68-69.

"Under Lock and Key," August, pages 62-67.

"Voyage to the Bottom of the Sea," December, pages 52-57.

"Watching How Composites Grow," July, pages 70-71.

Barlage, John A.

"Viscous Couplings Enter Mainstream Vehicles," October, pages 58-60.

Belegundu, Ashok D.

"Optimizing the Shapes of Mechanical Components," January, pages 46-48.

Besl, Michael L.

"Transmitting Torque with an Oil-Shear Brake and Clutch," November, pages 74-77.

Brown, D.R., et al.

"Integrating Thermal Energy Storage in Power Plants," September, pages 84-90.

Burd, Brian A., et al.

"Stealth Composite Frame for Generators," March, pages 74-76.

Clayton, Robert W., et al.

"Halting Fracture of Cast Steel Sleeves," June, pages 86-90.

Den Braven, Karen, et al.

"Improving Heat Pumps and Air Conditioning," September, pages 98-102.

Drost, M.K., et al.

"Integrating Thermal Energy Storage in Power Plants," September, pages 84-90.

Etter, Robert J., and Michael B. Wilson

"Testing Ship Designs in a Water Tunnel," October, pages 74-80.

Falcioni, John G.

"Striking at the Core of Bowling Balls," August, pages 44-48.

Fraser, James W., and Richard S. Gureghian

"Controlling Shock and Vibration in Electronic Products," December, pages 82-84.

Gureghian, Richard S., and James W. Fraser

"Controlling Shock and Vibration in Electronic Products," December, pages 82-84.

Fraser, James W., and Richard S. Gureghian

"Controlling Shock and Vibration in Electronic Products," December, pages 82-84.

Gureghian, Richard S., and James W. Fraser

"Controlling Shock and Vibration in Electronic Products," December, pages 82-84.

Herold, Keith, et al.

"Improving Heat Pumps and Air Conditioning," September, pages 98-102.

Howie, Ian, et al.

"Stealth Composite Frame for Generators," March, pages 74-76.

Hull, John R.

"Advanced Materials for Superconductivity," September, pages 92-97.

Irani, Rohinton K., and Mukul Saxena

"Knowledge-Based Modeling of Turbine Nozzles," July, pages 84-90.

Japikse, David, and Frank A. Olsofka

"Agile Engineering Accelerates Design," November, pages 60-62.

Komanduri, Ranga

"Machining Fiber-Reinforced Composites," April, pages 58-64.

Lambert, John M., et al.

"Stealth Composite Frame for Generators," March, pages 74-76.

Liddle, Ian, and Steven Reilly

"Diagnosing Vibration Problems with an Expert System," April, pages 54-55.

Mei, Viung, et al.

"Improving Heat Pumps and Air Conditioning," September, pages 98-102.

Mattei, David

"New Version of IGES Supports B-Rep Solids," January, pages 50-52.

O'Connor, Leo

- "Back to the Future," March, pages 56-59.
"Clearing the Air with Natural Gas Engines," October, pages 52-56.
"Electrohydraulic Valves Take Control," June, pages 54-57.
"Energizing the Batteries for Electric Cars," July, pages 73-75.
"Fluid-Film Foil Bearings Control Engine Heat," May, pages 72-75.
"Making Light Work of Fabric Cutting," November, pages 64-66.
"New Turn for Rotary-Valve Engines," January, pages 54-58.
"Regulating Output of Motion Control Systems," July, pages 52-55.
"Setting the Shaft Straight," October, pages 82-84.
"Taming Vibrations in Turbines," April, pages 48-52.
"Tilting Train Smooths Out the Curves," February, pages 62-65.
"Tiny Devices Take on Tough Tasks in Biomedicine," May, pages 62-67.
"Tunneling Under the Channel," December, pages 60-66.
"Unthreaded Fasteners Get a Grip," February, pages 50-54.
"U.S. Developers Join Magnetic Rail Push," August, pages 74-77.

O'Neal, Dennis, et al.

"Improving Heat Pumps and Air Conditioning," September, pages 98-102.

Olsofka, Frank A., and David Japikse

"Agile Engineering Accelerates Design," November, pages 60-62.

Ovens, William G., et al.

"Halting Fracture of Cast Steel Sleeves," June, pages 86-90.

Penoncello, Steve, et al.

"Improving Heat Pumps and Air Conditioning," September, pages 98-102.

Puttré, Michael

- "Beating the Heat with Analysis Codes," August, pages 38-42.
"Boundary Element Method Extends the Limits of Analysis," January, pages 42-45.
"CAM Codes Enable Small Shops to Compete," November, pages 50-54.
"Computer-Aided Injection Molding," June, pages 58-62.
"Control Software Puts Machines in Charge," September, pages 65-68.
"Eliminating the Tedious Chore of Meshing," February, pages 74-75.
"Gearing Up for Conceptual Design," March, pages 46-50.
"Materials Data Bases are Key to Design Analysis," May, pages 69-71.
"Multimedia Technology Opens Windows on Engineering Tasks," April, pages 67-69.
"Neural Networks Provide Solutions to Nonlinear Problems," October, pages 69-72.
"Picture This: Visualization Tools for CAD Drawings," December, pages 48-51.
"Piping Software Keeps Plants Flowing," February, pages 69-73.
"Putting Optimization Routines in the Loop," July, pages 76-80.
"Replacing Parts on Nature's Machines," May, pages 58-61.
"Teeing Off Indoors: Virtual Golf," August, pages 56-57.
"Thrust Vectoring Nozzles Give Pilots an Edge," March, pages 64-67.
"Undaunted Dante Readies for Inferno," December, pages 58-59.

Ramalingam, Mysore L., and Timothy J. Young

"Power of Thermionic Energy Conversion," September, pages 78-83.

Reilly, Steven, and Ian Liddle

"Diagnosing Vibration Problems with an Expert System," April, pages 54-55.

Saxena, Mukul, and Rohinton K. Irani

"Knowledge-Based Modeling of Turbine Nozzles," July, pages 84-90.

Scuria-Fontana, Camille

- "Analyzing Flow Improves Battery Thermal Guards," February, pages 66-67.
"Fitting and Regulating Artificial Limbs," May, pages 55-56.

Sinclair, Glenn

"Structural Reliability Through Fracture Mechanics," June, pages 79-84.

Siuru, Bill

"Instrumented Head Gasket Observes Combustion," July, pages 57-58.

Somasundaram, S., et al.

"Integrating Thermal Energy Storage in Power Plants," September, pages 84-90.

Sonnichsen, H. Eric

"Ensuring Spin Test Safety," December, pages 72-77.

Staff Report

"Computer-Designed Concrete Canoe is Fastest," August, pages 58-60.

Stienstra, David, et al.

"Halting Fracture of Cast Steel Sleeves," June, pages 86-90.

Tompkins, James E., et al.

"Stealth Composite Frame for Generators," March, pages 74-76.

Taguchi, Genichi

"Robust Technology Development," March, pages 60-62.

Valenti, Michael

"Alchemy of Composting," May, pages 80-82.

"In Search of Quality. . . American Firms Turn to ISO 9000," April, pages 42-46.

"Increasing the Flexibility of Process Control," October, pages 62-67.

"Keeping the Home Fires Burning," July, pages 66-69.

"One Hundred Years and Still Going Around in Circles," June, pages 70-76.

"Plasma-Spray Coatings Spread Their Wings," September, pages 60-63.

"Propelling Jet Turbines to New Uses," March, pages 68-72.

"Retrofitting Plants with Low-NO_x Burners," May, pages 76-79.

"Return of the Boomerang," December, pages 68-70.

"Stemming the Flood of Counterfeit Fasteners," February, pages 46-49.

"Taming Hanford's Most Troublesome Nuclear Waste Tank," November, pages 68-72.

"Today's Trash, Tomorrow's Fuel," January, pages 64-67.

"Tougher Standards for Burning Hazardous Waste," August, pages 68-72.

Willig, John T.

"Designing Urethane Leak Test Seals," December, pages 78-80.

Wilson, David Gordon

"Is Honesty Too Much to Ask for in RFPs?" November, pages 78-79.

Wilson, Michael B., and Robert J. Etter

"Testing Ship Designs in a Water Tunnel," October, pages 74-80.

Young, Timothy J., and Mysore L. Ramalingam

"Power of Thermionic Energy Conversion," September, pages 78-83.
